All other Counties in 2024	0	0	4	4	8	10	6	8	0	0

**Explanation of the Rate:** SilverSummit Healthplan, Inc. has filed rates with the Nevada Division of Insurance for its Individual Affordable Care Act (ACA) products in Nevada. The proposed rate change of 6.4% applies to approximately 22,870 individuals and includes an adjustment for the impact of COVID-19 on 2024 costs: We expect that the direct expense of COVID-19 testing and treatment, along with the secondary effects of the pandemic on medical expenditures, will result in a small net decrease to COVID-19 costs in 2024. These rates will be offered statewide and will be in effect for the entirety of 2024.

SilverSummit filed rates for the individual block of business in the State of Nevada for the first time in 2018. Rates for 2024 are based on experience collected during calendar year 2022. Actual experience will differ from projections for several reasons, including population changes, claims experience, and random deviations from assumptions.

Anticipated changes to the average health status, or morbidity, of the single risk pool along with medical trend each contribute to the premium rate change. Medical trend, or the increase in health care costs over time, is composed of two components: the increase in the unit cost of services and the increase in the utilization of those services. Unit cost increases occur as care providers and their suppliers raise their prices. Utilization increases can occur as people seek more services than before. Additionally, simple services can be replaced with more complex services over time, which is known as service intensity trend. An example of service intensity trend would be the replacement of an X-ray with an MRI scan. Replacing the service with a more intense service causes the total cost of medical services to increase.

Whether the government reimburses cost-sharing amounts for lower income individuals greatly impacts the rates. Rate levels assume that there will be no funding of cost-sharing reduction subsidies. The premium rate change reflects updated expectations regarding the portion of individuals enrolling in cost-sharing reduction plans.

SilverSummit's projected administrative expenses for 2024 are \$83.42 per member per month, or 14.60% of premium, in addition to \$44.18 for taxes and fees. The projected loss ratio for 2024 is 80.8%, which satisfies the federal minimum loss ratio requirement of 80.0%.
